

## On-Premises Roadblocks

VS

## Cloud ROI

Fast-moving organizations understand the importance of real-time financials to compete successfully. They recognize the risks of delay and the many advantages that only a cloud financial system can provide their organization.

### 5 reasons to switch to Sage Intacct now

#### On-premises Roadblocks

**Challenging remote access**

- Expensive remote access servers

**Painful upgrades that feel like a re-implementation**

**Poor integration with other systems**

- Expensive workarounds to connect with other software

**Reduced performance**

- Performance declines as users and transaction volumes increase

**Higher-than-expected costs**

- Costs more than just software maintenance and support
- Costs for added servers, especially for multi-entity organizations

#### Sage Intacct Cloud Software ROI

**Anytime, anywhere access**

- Greater than 99.9% availability and rigorous data security certifications

**Automatic updates with no implementation necessary**

**Modern cloud APIs**

- Integrations at 1/10th the cost

**Built to scale as you do**

- User and transaction volumes grow without impacting performance

**Cloud ROI**

- Sage Intacct software payback can take as little as 4 months\*
- No IT costs for

\* Payback varies depending on specific Sage Intacct installation and other related factors.
