

CPAs & ADVISORS

TRADE AND PROFESSIONAL ASSOCIATIONS

Trade and professional associations play an important role in our economy by uniting businesses in the same industry or people in the same profession to advance their common interests. While there are many advantages to their members in terms of education and networking opportunities, associations themselves face a number of challenges in the current business climate. Those that are thriving are embracing private sector business practices and innovative technologies, identifying and leveraging additional sources of revenue, and proactively addressing regulatory and industry issues like privacy.

Dedicated Association Expertise

GRF provides trade and professional associations with the support they need to tackle these economic and technological shifts. Our experts provide accounting, tax and advisory services with a focus on industry best practices and innovation from the business world. As a result of GRF's work with clients around the world, international membership organizations can draw upon our firm's extensive global experience.
